

## Connectivity/API

Bitcoin Suisse offers clients an easy to use system-to-system interface to our high quality and reliable brokerage services and our highly secure custody solution. Our experts will guide and assist clients from onboarding, through realization, to post-implementation support.

## Solution Offerings

### Integration services based on open standards

- Rest API
- FIX\*
- Full API documentation including code examples
- Inhouse technical support

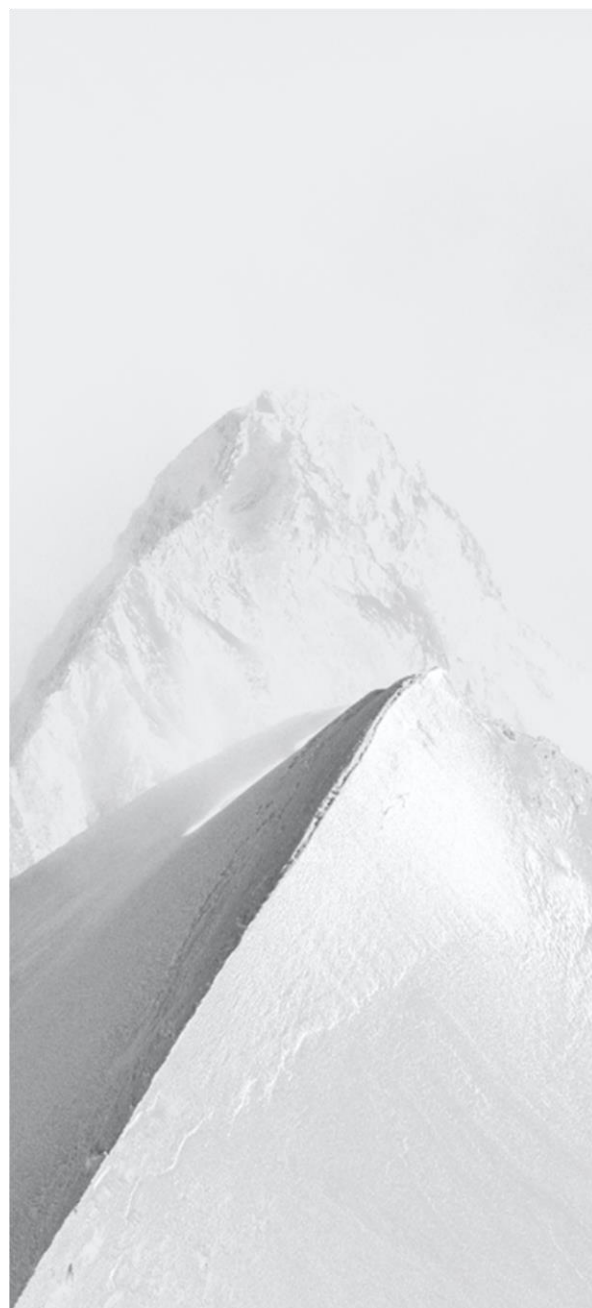

### Post-trade services and back-office

- Standardized settlement process (T+0/T+1)

## Solution Features

We provide our clients with direct API access to our trading engine to receive fast and best possible execution.

- Real-time balance overview
- Instantly view credit limits
- Request for quote on over 115 tradable tokens and 5 fiat currencies
- Place buy/sell orders on crypto-to-fiat or crypto-to-crypto pairs
- Real-time execution information
- Historical trade details
