Confirmation of Assurance Engagement according to ISAE 3402 Type 2

We hereby confirm that we have been engaged by Bitcoin Suisse AG on August 18, 2022 to perform an assurance engagement on the descriptions of your systems and the design, implementation and operating effectiveness of controls related to your crypto storage solution ("Vault"). The control framework defined by Bitcoin Suisse AG includes control objectives for the following areas:

- Key Generation and Distribution
- Key Management
- Transaction Authorization and Client Data Management
- Vulnerability Management and Security Configurations
- Physical and Logical Access Management
- Change Management
- Disaster Recovery and Business Continuity Management

The assurance engagement concluded with an ISAE 3402 Type 2 report, which has been issued on February 24, 2023 and includes our opinion on the design, implementation and operating effectiveness of controls throughout the period January 1, 2022 to December 31, 2022.

Our engagement is performed in accordance with International Standard on Assurance Engagements ISAE 3402. This standard requires us that we plan and perform our procedures to obtain reasonable assurance about whether, in all material respects, the description is fairly presented and the controls were suitably designed and operating effectively to achieve the related control objectives stated in the description throughout the period from January 1, 2022 to December 31, 2022.

Our audit procedures depended on the scope of systems and controls, as well as the scope of Bitcoin Suisse AG's Vault clients, which was defined solely and in advance by Bitcoin Suisse AG.
